David Black checked his stretch 6/12 from the pump house to boundary with John Grimsey. I am pleased to report all good, in fact I'm genuinely impressed with how it stood the test. Along most of it there are just odd spots where the water ran over with no damage.

There is one stretch that is lower, from the boundary with John Grimsey, the double fence, to the next style heading to the pump. There were several 25 m+ stretches that overtopped, no damage still excellent grass cover but enough water to cross the delph and cover about six acres the other side, though this quickly drained away.

Overtopping on Cordle wall west of Orford Quay,
